

June 5, 2012

To whom it may concern:

I am a Delivery Order Manager for Gracon Corporation, located on the United States Army base at Fort Riley, KS. The bulk of our work involves remodeling facilities within the Job Order Contract delivery method. I have worked directly with Roger Gibson and Patriot Abatement Services (PAS) since the company's inception.

PAS has successfully bid and worked on six projects for our company since September of last year. Abatement operations are consistently completed on schedule and without issues. PAS has been willing to do what is necessary to accommodate each individual job. They have worked after hours to facilitate ACM removals in high occupancy buildings and have worked through weekends so clearances can be issued prior to start of the next work week.

PAS employees maintain a safe working environment and are conscientious of project specific conditions. These employees have a good work ethic that starts with front line supervisor, Noe Cortez. He is very knowledgeable of the trade and has the ability to trouble-shoot in order to handle project complexities. PAS particularly excelled when completing floor tile and mastic abatement on our renovation project at building 301. The user requested that all operations be completed when unoccupied. PAS made themselves available to start work as soon as the building was cleared. This work was completed over the weekend with no interruption to the users of the office space.

Sincerely,

A handwritten signature in black ink, appearing to read "Boone Burnside". The signature is fluid and cursive, with a large initial "B" and a long, sweeping underline.
